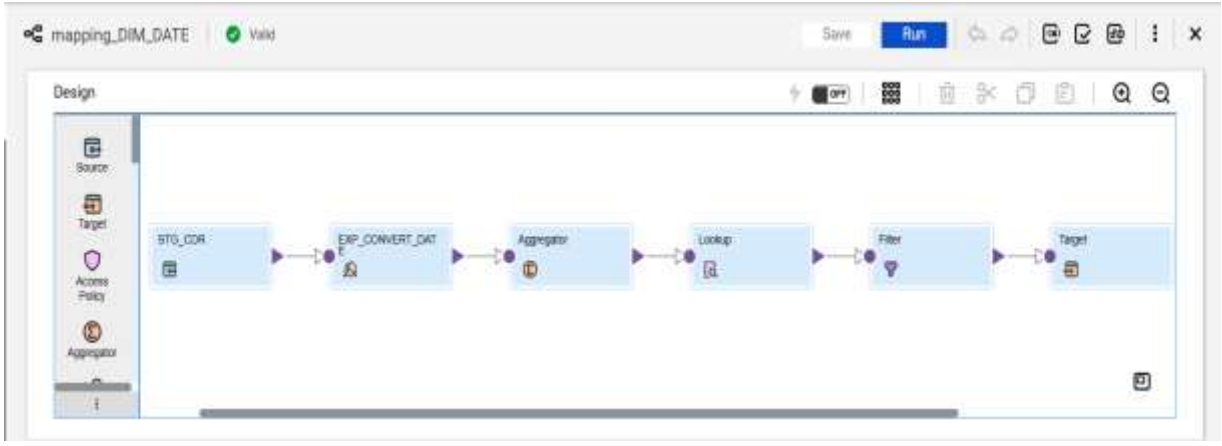
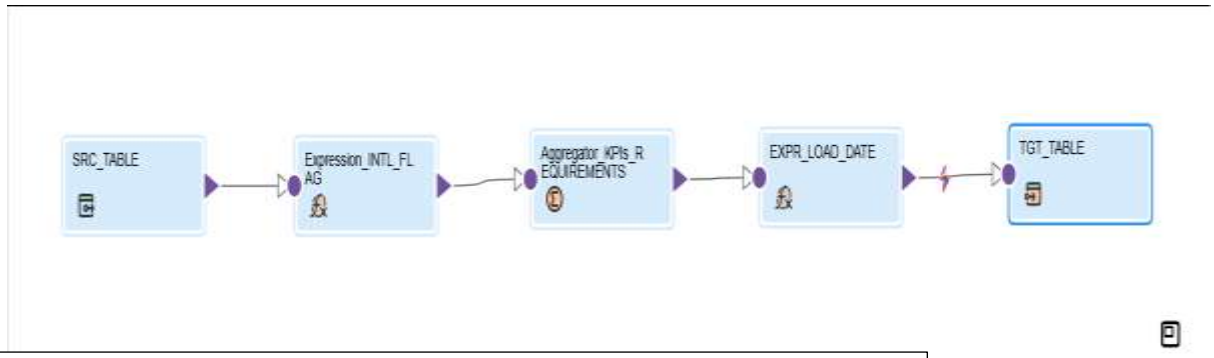
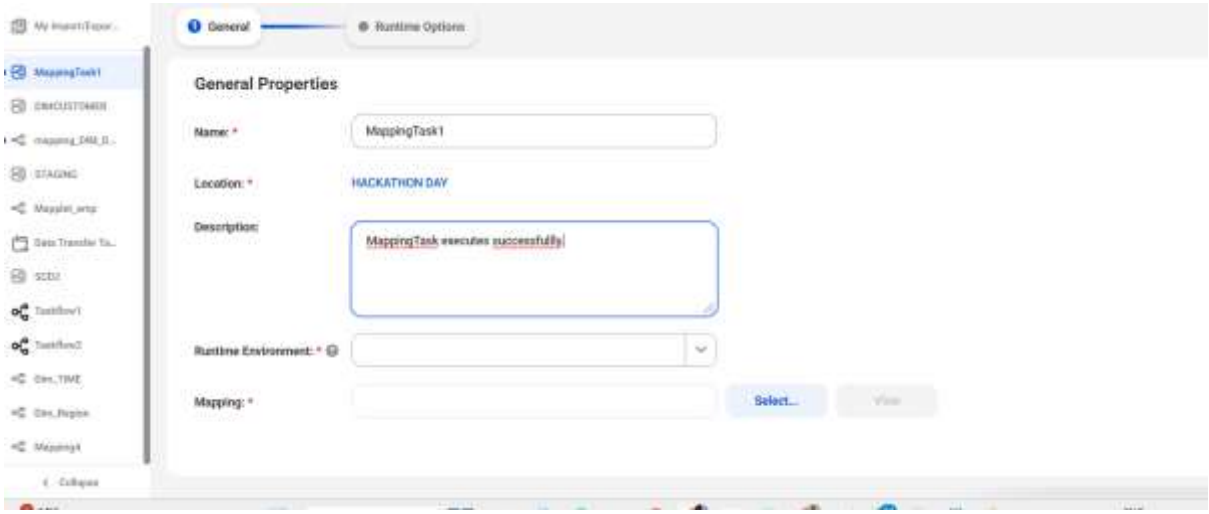
a) Mapping for the dimension table:



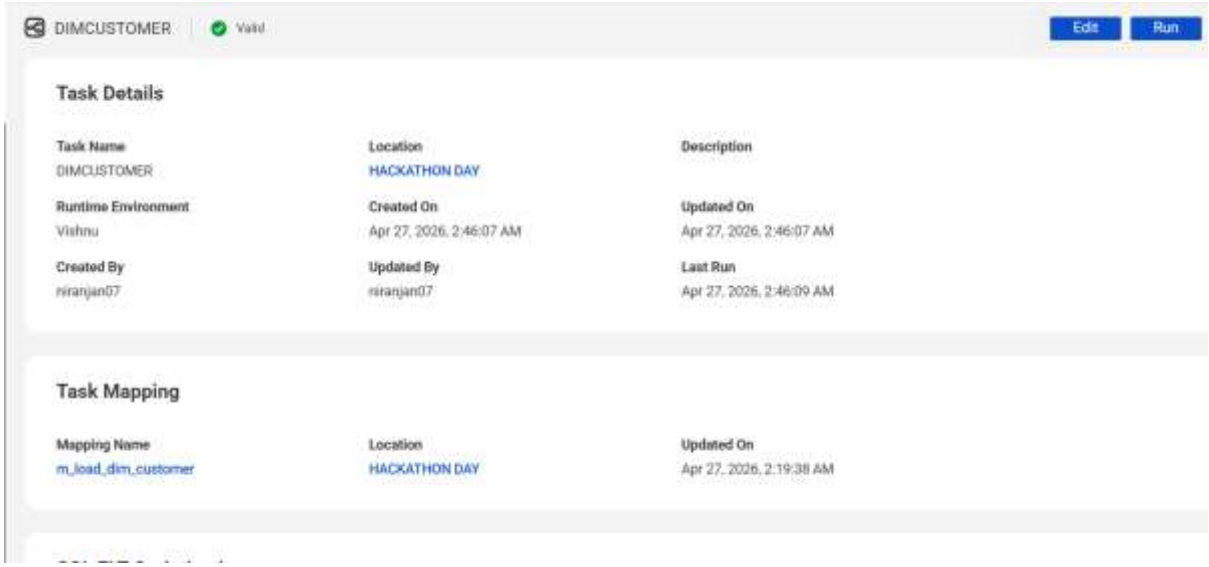
b) Mapping for: Key Performance Indicators @ UseCase-3



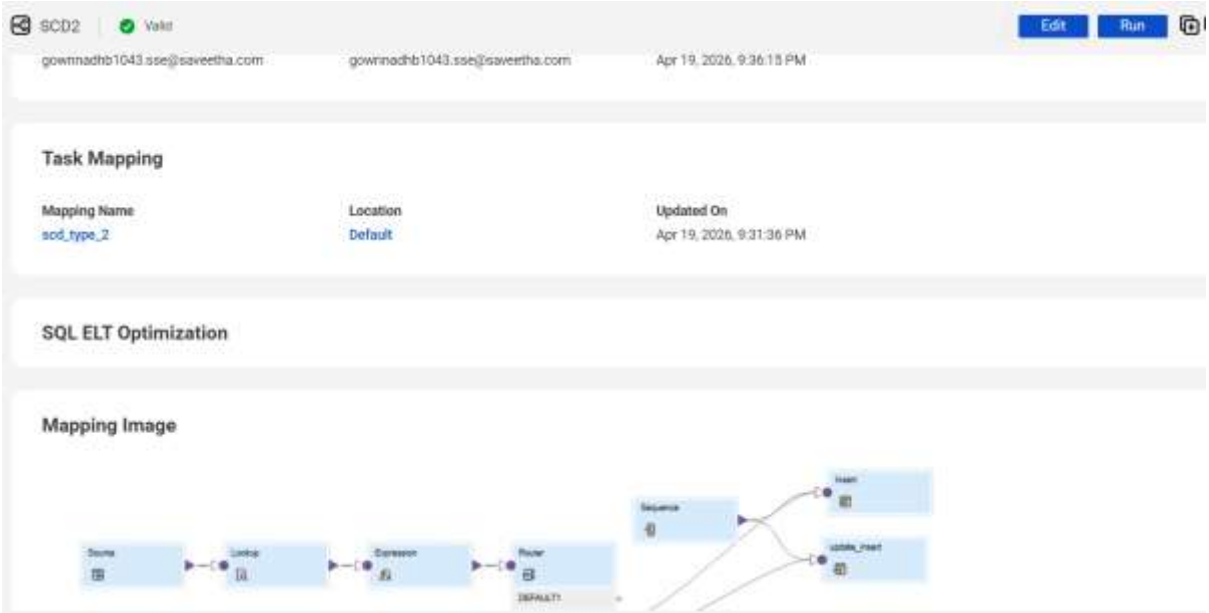
c) Mapping for: MappingTask1- Target and Source Checking, Type-A



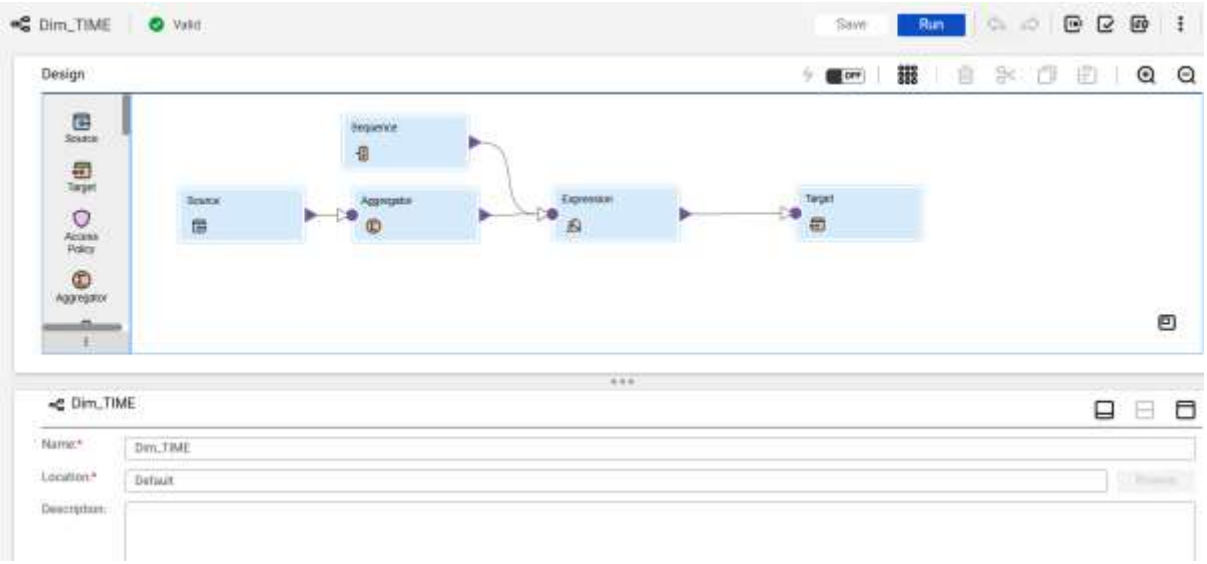
d) Task Flow: DIMCUSTOMER



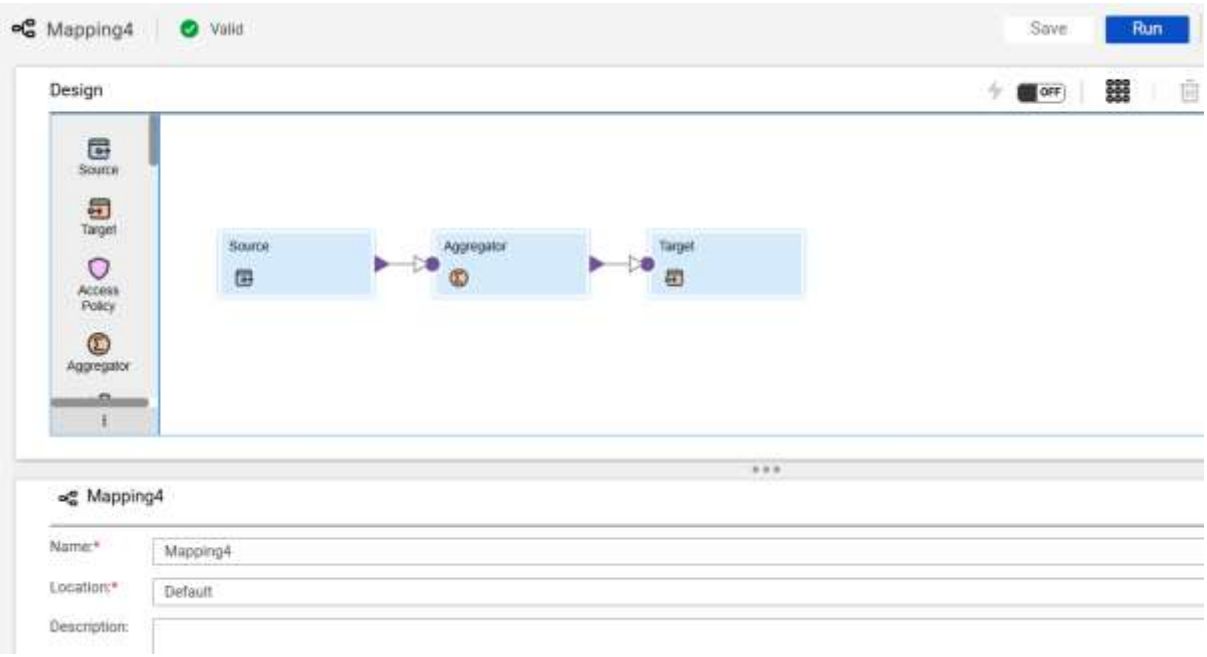
e) Slowly Changing Dimension Img, describing changes over 12 hr periods when calls are counted overall including their revenue totals.



f) Mapping Task for Dim_TIME mapping to analyse Caller Time Period and Statistics



g) Mapping Task-4: For Aggregator O/Ps for all data from Source in Staging Layer to Target with defined Database target.



Project Jobs: Complete Mapping Taskset by the team: Solution Sages

Add Field

A BRIEF ON THE KPI USECASE 3: (REFERENCE IMAGE: b) KPI_UseCase_3, given as):->

USE CASE 3: International Call Monitoring--> (uses the: 'IS_INTERNATIONAL' flag), comes after call data analysis

KPIs evaluated and analysed:

a)> International Call Count

b)> International Call Duration

c)> International Revenue Per Call

d)> % of International Calls

A LOOK AT THE ETL FLOW FOR 'USE CASE 3':

FACT_CDR/CALL_TYPE (Source)

↓

Expression (Create INT_FLAG with condition and flags as: 1, 1, 0)

↓

Aggregator (Compute totals)

↓

Expression (Calculate % + Load Date)

↓

Target (INT_CALL_SUMMARY)

//ETL FLOW WITH TRANSFORMATIONS DETAILED AS:

4. Transformation Flow (STEP-BY-STEP):

Step 1: Source Transformation--> Read from FACT_CALLS

Step 2: Expression Transformation (Create Flag)--> Create: INT_FLAG = IIF(IS_INTERNATIONAL = 1, 1, 0):

'1' is condition, while '1' if true, or '0' when false

Step 3: Aggregator Transformation (CORE) Configuration:

output fields:--->

TOTAL_CALLS COUNT(*)

TOTAL_INT_CALLS SUM(INT_FLAG)

TOTAL_INT_DURATION SUM(DURATION * INT_FLAG)

TOTAL_INT_REVENUE SUM(REVENUE * INT_FLAG)

Step 4: Expression Transformation (Percentage)--> PERCENT_INT_CALLS = (TOTAL_INT_CALLS * 100.0) / TOTAL_CALLS

Step 5: Expression Transformation (Load Date)--> LOAD_DATE = SYSDATE

Step 6: Target Transformation--> Load into INT_CALL_SUMMARY

SQL Queries declared as:

a) International Call Count:

```
SELECT COUNT(*)
FROM FACT_CDR
WHERE IS_INTERNATIONAL = 1;
```

b) International Call Duration:

```
SELECT SUM(DURATION_SECS)
FROM FACT_CDR
WHERE IS_INTERNATIONAL = 1;
```

c) International Revenue:

```
SELECT SUM(REVENUE)
FROM FACT_CDR
WHERE IS_INTERNATIONAL = 1;
```

d) %age of International Calls in Total:

```
SELECT
        (SUM(CASE WHEN IS_INTERNATIONAL = 1 THEN 1 ELSE 0
END) * 100.0)
        / COUNT(*) AS PERCENT_INT_CALLS
        FROM FACT_CDR;
```
